

For Sale is a Thruline Bird Wattmeter Model 43. It is in excellent condition and there are no bumps, scratches or dings anywhere on the unit. It includes a 250W 100 - 250MHz slug. I have no use for it and would love to see it go to someone that can put it to good use. These are pricing well over \$200.00 on eBay, but I will let this one go for \$175.00. If you are interested, you can either drop me an e-mail or give me a call.
